*T120 Series II HydroSeeder  
Gooseneck Trailer. (T120GN)*

The FINN T120 Series II HydroSeeder is a real workhorse with a 1,000 gallon working tank capacity. FINN developed HydroSeeder technology in 1953. We've been the industry leader in quality and innovation ever since. With the FINN T120 Series II, you don't have to settle for less than proven FINN quality to tackle a wide range of highly demanding hydroseeding applications.

### **Power To Spare.**

The T120 Series II provides muscle with a rugged and dependable 33.5 hp, 4 cylinder water cooled Kubota diesel engine. Available in skid, gooseneck trailer, or straight pull trailer configurations, the T120 Series II HydroSeeder covers up to 1/3 of an acre with one full tank. Tower discharge distance reaches up to 180 feet for greater slurry application and efficient coverage. In addition, the T120 Series II is equipped with full deck railing and plenty of storage capacity to carry extra materials.

### **Positive Control.**

The FINN T120 Series II HydroSeeder features a heavy-duty agitator driven by a variable speed, reversible hydraulic motor. The agitator and pump are independently driven, allowing for complete mixing of the slurry without pump operation, and FINN's direct drive clutch and pump assembly are specifically designed to optimize horsepower efficiency and maximize pump performance.

*Models shown include optional equipment.*

Other features include independent rubber torsion suspension axles that are equipped with electric brakes, including break-away switch; and a direct drive clutch with an adjustable external wear plate.

As the world leader for over 70 years in the design and manufacture of innovative, quality equipment for the green industry, and as the inventor of the HydroSeeder, FINN Corporation is committed to your complete satisfaction.
